Assignments

300 points of your grade in this course will be based on chapter quizzes. To help you understand the concepts discussed in the textbook, you will be required to complete 15 quizzes. Each quiz will be presented at the beginning of class, will cover concepts you read about in your textbook, and be worth 20 points each.

200 points of your grade in this course will be based on your group project. The points for your group project consist of three components: 100 points will be an overall group grade, 100 points will be an individual grade, 50% of your individual grade is derived from your group member's feedback regarding your contribution to the project, the remaining 50% is composed of my observations during your part of the presentation. The project requires in-depth research of a modern perspective in psychology (refer to the chart on pg. 14 of your text), which includes its focuses and concepts, theorists, criticisms, and how it helped advance psychology to be presented to the class.

100 points of your grade in this course will be based on your final exam. There will be a final exam, given during final's week. You will be expected to define concepts, answer questions, and (or) multiple-choice questions.

100 points of your grade in this course will come from a journal. At the end of each week, three journal topics will be posted in the News section of eLearn. You are to select one topic and write a minimum of 4 paragraphs (3 sentences or more per paragraph) in APA format on your chosen topic. This process will develop your critical thinking and writing skills while allowing you to demonstrate your understanding of the week's content and how it applies to modern day. Your journal will be submitted 4 times throughout the semester, with each submission being worth 25 points of the total 100.

50 points of your grade in this course will be based on an article review. The article review will involve you selecting and critically reading one article from a pre-selected listed, located in eLearn. You will demonstrate an awareness and understanding of the impact of the social and/or natural environment on the development of self and/or cultural diversity. You will demonstrate an awareness and understanding of the impact of the social and/or natural environment on the individual and group experience.
